

Instruction for Skeleton Candy Coffin

Thank you for viewing the instruction on how to construct the Skelton Candy coffin. We've included everything here so you can download and make your candy coffin party favors, just follow the instructions below.

Materials:

Scissors or Exacto Knife
Glue or Double Side Stick Tape
Card Stock or Thick Paper

Step 1:

Print the pdf on 8 ½" x 11" card stock or thick paper. If you can't find any card stock, take some 8 point poster board and cut it down to the above dimensions (that's what these skeletons are actually printed on). Finally gather some Glue and Double Sided Sticky Tape and a pair of Scissors like the image to the right.

Step 2:

Cut the Skeleton Candy Coffin out and cut the slits on the bottom. This is the most time consuming part out of this project. We're over half way done now.

Step 3:

Fold on the dotted lines. Don't forget to fold right above the skeletons head!

Step 4:

Put some double sided sticky tape or glue on the tab next to the Vintage Beistle logo (We highly recommend glue for this tab so everything stays together). Fold the sides of the skeleton coffin and secure the sticky tab next to the Vintage Beistle logo onto the inside of the Skelton coffin. Your skeleton coffin should look like the image to the right.

**Step 5:**

You're almost done. Put some glue or stick tape on the top tabs. Fold it inwards and secure it the inside of the skeleton coffin. The bottom has the perfect amount of room for one finger so you can press the tabs onto the inside of the coffin.

Optional Step:

Stuff the skeleton coffin with candy or treats. It should be able to fit 2-3 pieces of candy depending on their size.

Step 6:

Seal the coffin by folding and locking the slits made on the bottom. Your candy coffin is now finished!
